ETHERIAL BODY VISIBLE.

Semi-Transparent Mass Surrounding the Bones Penetrable by Rontgen Rays.

They say they have seen the etherial body, one of man's subtler bodies interpenetrating the dense physical body. The orientals have long claimed to have seen it with a higher vision and the occidentals are now seeing it by the aid of instruments. In being able to see the skeleton of a live person by Rontgen rays we have gone far to surmounting difficulties in making out the shadow of the etherial body. A hazy, semi-transparent mass surrounds the bones in a skiagraph which seems to invite definition by simple methods of research requiring little more than a better understanding of the offices of the different rays of light to give us a glimpse of the man that survives the mortal casement. The etherial body, erroneously termed the soul, seems to be a compound of those electric corpuscles of which matter is supposed to consist, with the unknown principle of animal life, and it is obviously a connecting link between mind and matter. A discovery of this sort is calculated to revolutionize the mental sciences and correct many erroneous ideas. It particularly is important to ascertain how the etherial body acts during life. Many doubt the existence of any inner form of this kind. But it is an established belief in the east, especially in India, handed down from ancient days. It is difficult to see how their knowledge could have been so complete, even including the fact that the etherial body never grew old after attaining maturity, unless they had been able to catch sight of the inner form.

Uncle Jerry.

"Don't take no stock in the man that's always whisperin'," advised Uncle Jerry Peebles. "If he's afraid to trust his own voice there's somethin' wrong on the inside of 'im."

Babylon First Populous City.

Babylon was probably the first city to attain a population of a million. The area of the city was 225 square miles.

MUSIC OF THE NIGHTINGALE

When Heard by Day Is Not All That It Is Cracked Up to Be.

The nightingale's song was, of course, unlike my preconceived idea of it. I had expected a rushing outpouring of music, but I found a more deliberate song of disconnected phrases of three to five seconds length each, followed by pauses of almost equal duration, writes Frank M. Chapman, in Scribner.

"The nightingale, in transport seemed to fling his warble out, and then sit listening."

Occasionally a more prolonged strain was given, but, as a whole, the song lacked the force, crescendo and diminuendo effects of a continuous effort. It is a surprisingly loud song, in tone a decided whistle; a wonderfully voluble, varied, but rather hard performance. At times a measure or two suggested portions of the song of our nocturnal singer, the chat, and again some of the more rapid calls reminded one of certain notes of the Carolina wren, but as a whole we have no bird whose song resembles that of the nightingale.

Two days later, at Cambridge, hearing a nightingale singing in the afternoon, when its voice formed merely a part of the springtime chorus, I was impressed alike with the part the bird's nocturnal habits have played in establishing its reputation as a songster and with the characteristic ornithologic insight displayed in Shakespeare's lines:

"The nightingale, if she should sing by day,
When every goose is cackling, would be thought
No better a musician than the wren."

Punishment Too Severe.

"A boy assassin hanged," read Mrs. Bascom from the newspaper. "Well," she remarked, "a sassin' boy is a great trial, but I don't think he ought to be hanged for it."
